The public is able to provide a view on their satisfaction levels of VFM every two years. The results of this measure have historically been very low and therefore has been a focus of the Council.	The most recent data was achieved during the public budget consultation 2014/15. The results showed an increase of 19% in satisfaction levels.	Satisfaction levels of Plymouth residents are expected to continue increasing following a communication programme around the 3-year sustainable budget which will deliver the priorities as identified by residents.

Additionally new homes and business occupancy rates are also included within this measure as this increases the base of both Council Tax and Business Rates	All the elements that make up this measure performed well in 2014/15 and performing well throughout 2015/16. This data has then influenced decisions within the Council in order to maximise the benefits of this.	Future performance is expected to be good around this measure as one of the Councils objectives is to grow the city, therefore increasing the Council Tax and Business Rates base. Additionally, the structure of services within the authority supports a high rate of collection. There is a slight dip in current Council Tax collection, however proactive measures and actions are being taken to ensure that this performance increases.
