Symbol **Description**

I Statistics for the number of people on Universal Credit relate to the second Thursday of each month.

II A limited test of the full Universal Credit service was launched in Sutton, South London on 26th November 2014, and has expanded to other areas since. This publication now includes statistics covering both the live and full Universal Credit service. Please see <https://www.gov.uk/government/publications/universal-credit-transition-to-full-service> for details of the areas in which the full Universal Credit service is operating.

III Figures provided for starts show the Jobcentre Plus office recorded at the start of the claim, whereas the figures for the number of people on Universal Credit are representative of the current Jobcentre Plus office that the claimant is attending. It is possible for people to have started on Universal Credit in one office and have moved to another office during their claim, and for this reason, the number of people on Universal Credit can be higher than the starts figure for any particular office, however it is more noticeable when numbers are low.

IV "." denotes a nil or negligible number of claimants or award amount based on a nil or negligible number of claimants.

p Figures marked "p" are provisional. These figures will be subject to revision in subsequent releases. It is expected that overall provisional figures will be within two per cent of their revised figure in future releases. Figures relating to the employment breakdown will be also be subject to revision.

r Figures marked "r" have been revised since the previous release.

Notes:

1. "-" denotes nil or negligible; "." denotes not applicable; ".." denotes not available.

2. Universal Credit entitlement is calculated over monthly Assessment Periods. Claims which are paid on time will receive payment by the payment due date, which is 7 days after the Assessment Period ends

3. These statistics show, for households that have an assessment period that spans the count date (the second Thursday of the month) and that have been paid, the proportion which received either full or partial payment on time. The 'caseload month' is the month in which the count date falls (eg. for the count date 8 November 2018 the caseload month is November 2018).

4. Please note that this methodology is different to previously published Universal Credit Payment Timelines statistics, which are based on the week that the payment was due, rather than the caseload month (link below)

5. Results for 'All claims' give a full picture of payment timeliness for UC full service. Results for 'new claims' reflect the timeliness of the first payment to claimants (i.e. relating to the first Assessment Period of the claim). There are a number of one-off verification processes that must be completed by the claimant and by DWP at the start of the claim – to confirm the current circumstances of the claimant (or both claimants in a joint claim) and their entitlement to UC. Payment timeliness is therefore liable to be lower for new claims.

6. Universal Credit Household statistics are subject to revision in future publications. These statistics are based on the status of each claim as at 1st January 2019.

Information which is provided or verified after this date can result in further late payments being made to these households. Therefore payment timeliness figures are likely to be revised downwards as more payment data become available.

7. Figures on payment timeliness are given from January 2017 as there were relatively low numbers of households on Universal Credit full service before that time.

8. All figures are subject to change as the methodology used to produce these statistics develops over time.

9. (r) = revised figures, (p) = provisional figures

| I | Statistics for the number of people on Universal Credit relate to the second Thursday of each month. |
| II | A limited test of the full Universal Credit service was launched in Sutton, South London on 26th November 2014, and has expanded to other areas since. This publication now includes statistics covering both the live and full Universal Credit service. Please see https://www.gov.uk/government/publications/universal-credit-transition-to-full-service for details of the areas in which the full Universal Credit service is operating. |
| III | Figures provided for starts show the Jobcentre Plus office recorded at the start of the claim, whereas the figures for the number of people on Universal Credit are representative of the current Jobcentre Plus office that the claimant is attending. It is possible for people to have started on Universal Credit in one office and have moved to another office during their claim, and for this reason, the number of people on Universal Credit can be higher than the starts figure for any particular office, however it is more noticeable when numbers are low. |
| IV | ".." denotes a nil or negligible number of claimants or award amount based on a nil or negligible number of claimants. |
| r | Figures marked "r" have been revised since the previous release. |
| p | Figures marked "p" are provisional. These figures will be subject to revision in subsequent releases. It is expected that overall provisional figures will be within two per cent of their revised figure in future releases. Figures relating to the employment breakdown will be also be subject to revision. |
