Tracey Lee

Chief Executive

Health and Wellbeing Board

9. Suicide Prevention

(Pages 1 - 8)

Plymouth Health and Wellbeing Board 7th October 2021

Suicide Prevention Update

Sarah Lees

Consultant in Public Health, ODPH

Background

- Suicide is a major societal issue
- In England ~ 6,000 deaths by suicide each year
- Average cost to society of each death ~ £1.67 million
- Leading cause of years of life lost
- Leading cause of death in men <50 years, in young people and in new mothers
- ~ 70% of those people who die by suicide are not in receipt of mental health services
- ~ 3 times more men than women die by suicide
- England average age-standardised rate [2017-2019] = 10.1/100,000. Plymouth rate 11.7/100,000
- Suicides are not inevitable, they are preventable

Impact of the COVID-19 Pandemic

- We know that risk factors for mental illness have increased during the pandemic
- We are seeing increased demand for mental health services [especially for anxiety and depression]
- National data shows no evidence of an increase in suicide deaths to date
- No local evidence of an increase in suicide deaths to date
- Coroner services closed for 6 months in 2020
- Delays to finalised data for 2020
- 2020 and 2021 likely to be unrepresentative years [due to coroner delays]

ONS Data 2017-2019

Compared with England ● Better 95% ● Similar ● Worse 95% ● Lower ● Similar ● Higher ○ Not applicable
Suicide rate (Persons) for Plymouth

Period	Plymouth				South West	England
	Count	Value	95% Lower CI	95% Upper CI		
2001 - 03	62	9.6	7.3	12.3	10.4	10.3
