

EXECUTIVE DECISION

made by a Cabinet Member

REPORT OF ACTION TAKEN UNDER DELEGATED AUTHORITY BY AN INDIVIDUAL CABINET MEMBER

Executive Decision Reference Number – L54 20/21

Decision	
1	Title of decision: PCC Next 7 Decarbonisation Project
2	Decision maker (Cabinet member name and portfolio title): Councillor Tudor Evans OBE, Leader
3	Report author and contact details: Alastair Gets, alastair.gets@plymouth.gov.uk , 01752 306930
4	Decision to be taken: It is recommended that the Leader of the Council: <ul style="list-style-type: none"> • Approves the Business Case • Allocates £1,672,900 into the Capital Programme funded by £1,597,900 from the Salix PSDS Sec31 and £75,000 from S106 funds • Delegates the procurement process to the Service Director for HR & OD • Delegates the acceptance of the Salix grants to the S151 Officer • Delegates the award of the contract to Service Director for SP&I
5	Reasons for decision: The business case covers decarbonising the heating systems at 7 PCC sites, including improving glazing, insulation and installing solar PV & Battery. The main benefit is reducing associated carbon emissions. Lowering carbon emissions will contribute to the declaration of a climate emergency, the pledge to be carbon neutral by 2030 and is part of the Corporate Carbon Reduction Plan. Nearly 3,400 tonnes of CO ₂ e will be reduced over the life of the measures. This project helps deliver JLP DEV32 – Delivering low carbon development by reducing the heating energy load and JLP DEV33 – Renewable and low carbon energy by the installation of heat pumps and solar PV. It also helps to deliver the promise of a “Green, sustainable city that cares about the environment” through delivering low energy heating to reduce carbon emissions and pollution.
6	Alternative options considered and rejected: Alternative technologies such as ground source open loop heat pumps were investigated but well-testing proved that it was not feasible for this part of the heat network, so air source heat pumps were chosen. Option 1: Do Nothing – no capital spending or revenue pressure but PCC fails reduce its carbon emissions and loses out on government grant money (would need to be paid back). Option 2: Do Minimum Option - only do buildings with energy savings (Council and Midland) but less carbon savings than the full project, challenging the net-zero by 2030 pledge, and losing out on a significant portion of grant money which would need to be topped up by PCC.
7	Financial implications: There is no additional corporate borrowing as most of the capital is grant

	funded and the rest is S106. For Economic Development (Crownhill Court) there is a revenue pressure of £18,775 in year 1 increasing to £17,996 in year 20. For the Corporate Landlord there is a revenue saving of £5,056 for measures in Midland and Council House, but a revenue cost for Derriford Business Park, Camel's Head, Frederick Str and Prince Rock Admin building of £26,549 in year 1, which reduces to £25,512 in year 20.			
8	Is the decision a Key Decision? (please contact Democratic Support for further advice)	Yes	No	Per the Constitution, a key decision is one which:
			X	in the case of capital projects and contract awards, results in a new commitment to spend and/or save in excess of £3million in total
			X	in the case of revenue projects when the decision involves entering into new commitments and/or making new savings in excess of £1million
		X	is significant in terms of its effect on communities living or working in an area comprising two or more wards in the area of the local authority.	
	If yes, date of publication of the notice in the Forward Plan of Key Decisions			
9	Please specify how this decision is linked to the Council's corporate plan/Plymouth Plan and/or the policy framework and/or the revenue/capital budget:		This project helps deliver JLP DEV32 – Delivering low carbon development by reducing the heating energy load and JLP DEV33 – Renewable and low carbon energy by the installation of heat pumps and solar PV. It also helps to deliver the promise of a “Green, sustainable city that cares about the environment” through delivering low energy heating to reduce carbon emissions and pollution.	
10	Please specify any direct environmental implications of the decision (carbon impact)		A reduction in carbon emissions estimated at nearly 3,400t over the life of the measures due to lower use of on-site fossil fuels and reduced imported electricity.
