

# Local Care Partnership (LCP)

Plymouth Local Care Partnership is one of five Local Care Partnerships across the Devon Integrated care system. “Together for Plymouth” reinforces the collective intent for collaborative working to solve some of the deep-rooted challenges we face and to create a step change in system transformation. The primary purpose of the Partnership is to provide leadership and oversight to our ambition of creating an integrated system, which puts the needs of our population ahead of that of any single organisation.

The overarching aims of the Partnership are:

- Improve health and wellbeing outcomes for the local population
- To reduce inequalities in health & wellbeing of the local population
- To improve people’s experience of care
- To improve the sustainability of the health and wellbeing system
- To develop into autonomous “place based” partnership with delegated responsibility from the ICB

# Overview

*The DHSC published a new integration white paper on 9<sup>th</sup> February 2022, 'Joining up care for people, places and populations'. The paper supports place-based partnerships to develop and mature by setting out a number of key deliverables.*

It aims to:

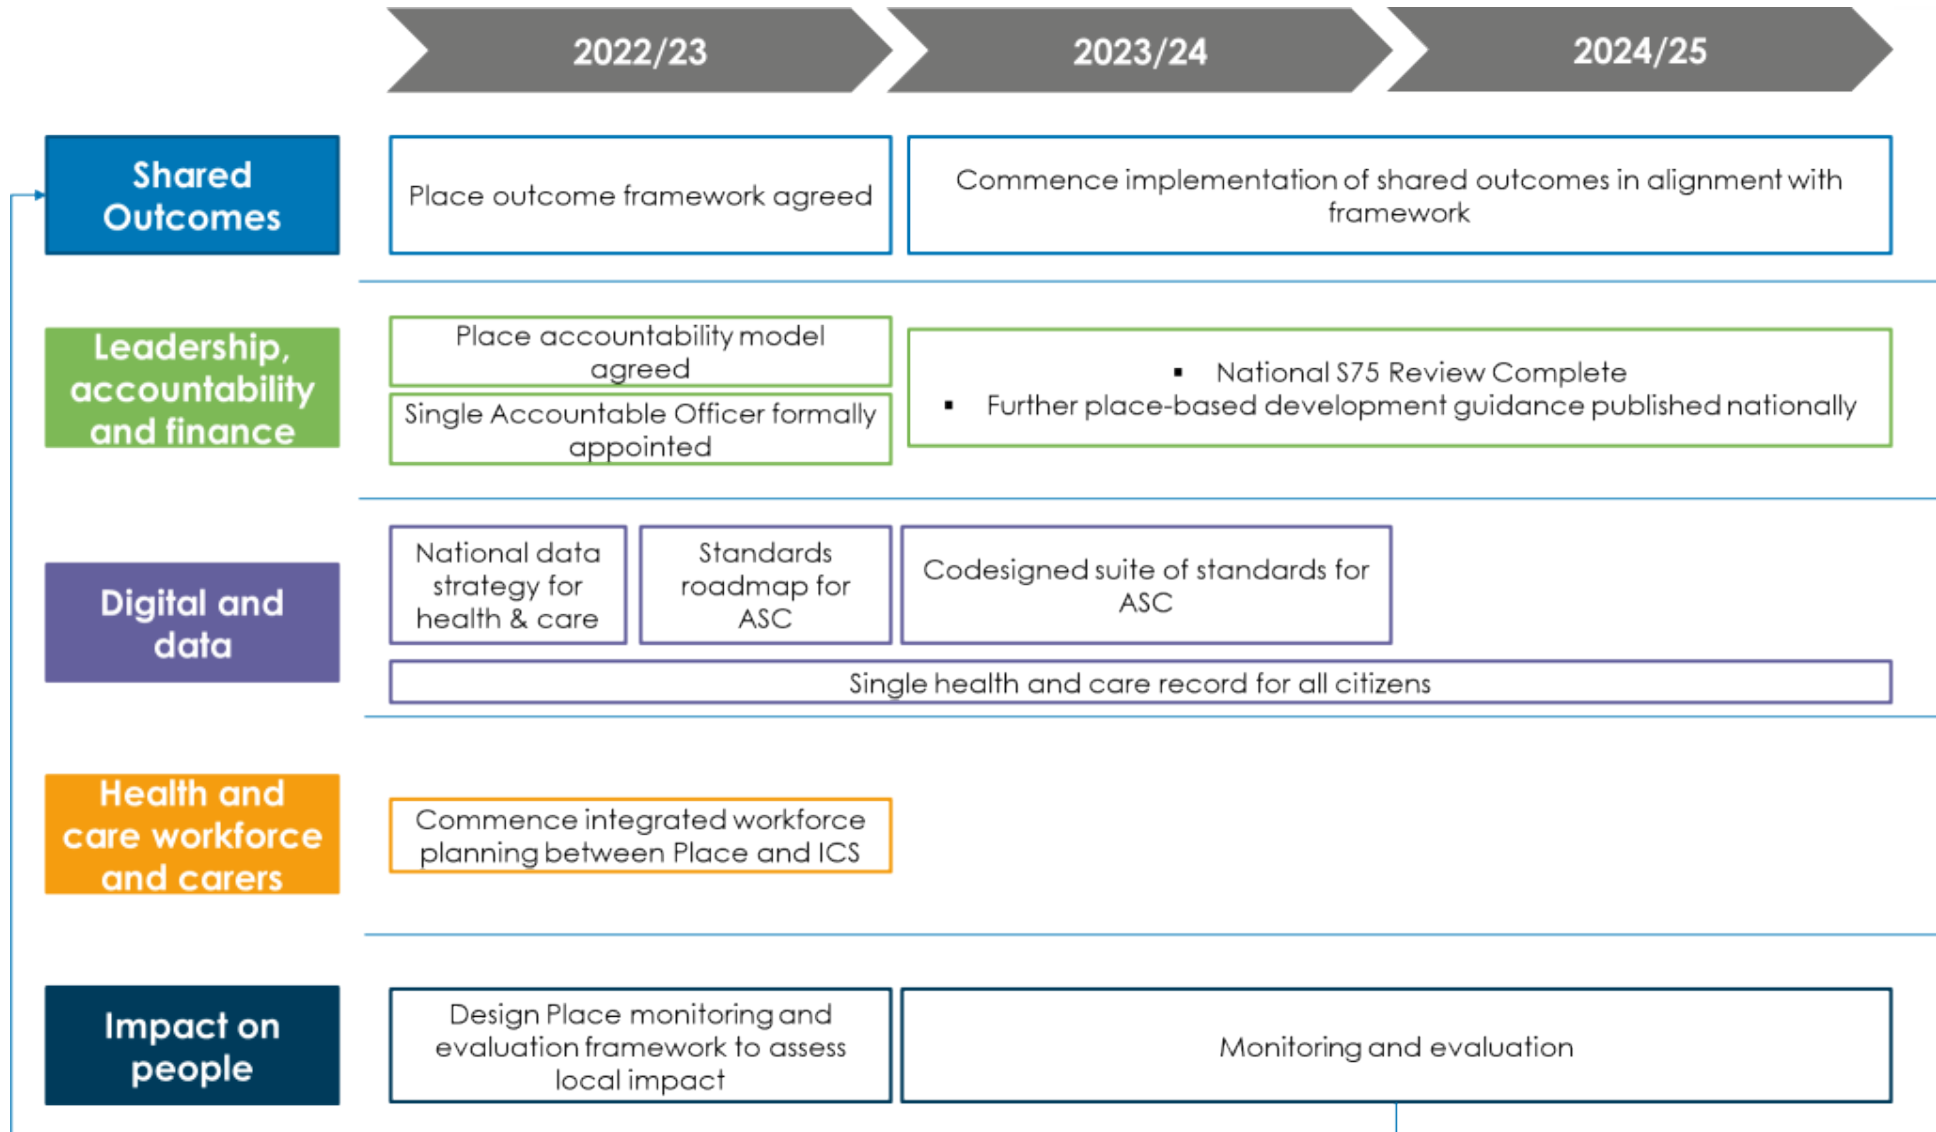

- Accelerate **better integration** across primary care, community health, adult social care, acute, mental health, public health and housing services which relate to health and social care.
- **Children's social care is not included** within the scope of the paper, and it is left to places to consider the integration between and within children and adult health and care services.
- Overall, the document is **not prescriptive**. **For example:** "To make integration a reality places must consider integration in a way that meets the local needs."
