

## **Lease Accounting Policy**

### **(Note 1.19 in Statement of Accounts Pages 40 to 42)**

#### **The Authority as Lessee**

From 01 April 2024, the authority has applied IFRS 16 Leases as adopted by the Code of Practice on Local Authority Accounting. The new accounting standard requires that the rights to use items acquired under all leases are recognised as assets on the Balance Sheet, together with a liability for the payments to be made for the acquisition. Previously this was only done for leases where the Council acquired substantially all the risks and rewards of ownership of the leased item (finance leases).

Contracts and parts of contracts, including those described as contracts for services, are analysed to determine whether they convey the right to control the use of an identified asset, through rights both to obtain substantially all the economic benefits or service potential from that asset and to direct its use. The Code expands the scope of IFRS 16 Leases to include arrangements with nil consideration, peppercorn or nominal payments.

#### **Initial Measurement**

Leases are recognised as right-of-use assets with a corresponding liability at the date from which the leased asset is available for use (or the IFRS 16 transition date, if later). The leases are typically for fixed periods in excess of one year but may have extension options.

The authority initially recognises lease liabilities measured at the present value of lease payments, discounting by applying the authority's incremental borrowing rate wherever the interest rate implicit in the lease cannot be determined. Lease payments included in the measurement of the lease liability include:

- fixed payments, included in-substance fixed payments
- variable lease payments that depend on an index or rate, initially measured using the prevailing index or rate as at the adoption date
- amounts expected to be payable under a residual value guarantee
- the exercise price under a purchase option that the authority is reasonably certain to exercise
- lease payments in an optional renewal period if the authority is reasonably certain to exercise an extension option
- penalties for early termination of a lease, unless the authority is reasonably certain not to terminate early.

The right-of-use asset is measured at the amount of the lease liability, adjusted for any prepayments made, plus any direct costs incurred to dismantle and remove the underlying asset or restore the underlying asset on the site on which it is located, less any lease incentives received.

However, for peppercorn, nominal payments or nil consideration leases, the asset is measured at fair value.

#### **Subsequent Measurement**

The right-of-use asset is subsequently measured using the fair value model. The authority considers the cost model to be a reasonable proxy except for:

## Appendix A

- assets held under non-commercial leases
- leases where rent reviews do not necessarily reflect market conditions
- leases with terms of more than five years that do not have any provision for rent reviews
- leases where rent reviews will be at periods of more than five years

For these leases, the asset is carried at a revalued amount. In these financial statements, right-of-use assets held under index-linked leases have been adjusted for changes in the relevant index, while assets held under peppercorn or nil consideration leases have been valued using market prices or rentals for equivalent land and properties.

The right-of-use asset is depreciated straight-line over the shorter period of remaining lease term and useful life of the underlying asset as at the date of adoption.

The lease liability is subsequently measured at amortised cost, using the effective interest method. The liability is remeasured when:

- there is a change in future lease payments arising from a change in index or rate
- there is a change in the group's estimate for the amount expected to be payable under a residual value guarantee
- the authority changes its assessment of whether it will exercise a purchase, extension or termination option, or
- there is a revised in-substance fixed lease payment.

When such a remeasurement occurs, a corresponding adjustment is made to the carrying amount of the right-of-use asset, with any further adjustment required from remeasurement being recording in the income statement.

### **Low Value and Short Lease Exemption**

As permitted by the Code, the authority excludes leases:

- for low-value items that cost less than £10,000 for land and property and £5,000 for vehicle, plant and equipment. when new, provided they are not highly dependent on or integrated with other items, and
- with a term shorter than 12 months (comprising the non-cancellable period plus any extension options that the authority is reasonably certain to exercise and any termination options that the authority is reasonably certain not to exercise).

### **Lease Expenditure**

Expenditure in the Comprehensive Income and Expenditure Statement includes interest, straight-line depreciation, any asset impairments and changes in variable lease payments not included in the measurement of the liability during the period in which the triggering event occurred. Lease payments are debited against the liability. Rentals for leases of low-value items or shorter than 12 months are expensed.

Depreciation and impairments are not charges against council tax, as the cost of non-current assets is fully provided for under separate arrangements for capital financing. Amounts are therefore appropriated to the capital adjustment account from the General Fund balance in the Movement in Reserves Statement.

## **The Council as the Lessor (Assets Leased Out)**

### **Operating Leases**

Where the Council grants an operating lease over a property or an item of plant or equipment, the asset is retained in the Balance Sheet. Rental income is credited to the (Surplus)/Deficit on Continuing Operations in the CIES. Credits are made on a straight-line basis over the life of the lease.
