# CAPITAL INVESTMENT BUSINESS CASE

Consolidated Active Travel Fund

### CPOG Reference No. - BC250040

# **EXECUTIVE SUMMARY**

The Executive Summary is a short summary of the Business Case and should be the last section you complete, this will enable you to extract only the key facts from relevant sections i.e. 'project on a page'.

The summary is a 'snapshot' of the business case which will need to tell the story and sell the proposal.

This business case seeks the approval to add external Department for Transport funding to the capital programme to improve walking and cycling provision in Plymouth. This will enable more active travel so as improving people's health, quality-of-life and access to opportunities, whilst helping to reduce the city's carbon emissions. There is a demonstrated need for each of the elements in the proposed package of measures which is deliverable within the funding and timescales available and therefore makes no ask on corporate borrowing.

# key notes from section I

£746,894 capital funding has been made available by Department for Transport for Plymouth to construct a programme of schemes that improve the walking and cycling environment and address safety concerns.

# key notes from section 2

Whilst risks of timescales and affordability exist within the programme they are known and will be managed.

## key notes from section 3

The programme addresses the causes of climate change and a route to market has been identified.

# key notes from section 4

The capital expenditure is expected to occur over the financial years of 2025/26 and 2026/27 which complies with the terms of the grant funder.

# key risks

The key risks relate to time and money; these are standard risks that the team are used to managing and will continue to manage throughout delivery.

| SECTION I: PROJECT DETAIL                         |   |  |   |  |  |  |
|---|---|--|---|--|--|--|
| Project Value<br>(indicate capital<br>or revenue) | Capital: £746,894   | Contingency<br>(show as £ and % of<br>the project value) | £74,689<br>10%  |  |  |  |
| Portfolio Holder                                  | Cllr John Stephens, Cabinet<br>Member for Strategic<br>Planning and Transport | <b>Service Director</b>                                  | Growth Directorate Paul Barnard (Strategic Planning & Infrastructure) |  |  |  |

| Senior<br>Responsible<br>Officer (client) | Richard Banner | Project Manager | Various  |
|---|----------------|-----------------|----------|
| Address and Post                          | Citywide       | Ward            | Citywide |

**Current Situation:** (Provide a brief, concise paragraph outlining the current situation and explain the current business need, problem, opportunity or change of circumstances that needs to be resolved)

The current walking and cycling provision requires enhancements and upgrades to sustain an appropriate standard of active travel. A lack of adequate cycle parking provision in the city can be seen as discouraging residents from choosing cycling as a mode of transport

**Proposal:** (Provide a brief, concise paragraph outlining your scheme and explain how the business proposal will address the current situation above or take advantage of the business opportunity) **and** (What would happen if we didn't proceed with this scheme?)

Active Travel England (ATE) will provide £746,894 capital funding under the Consolidated Active Travel Fund (CATF).

CATF funding is for:

- 1. New construction schemes with robust delivery plans;
- 2. Change control funding to unblock existing ATF schemes to secure timely delivery and improve scheme quality;
- 3. Essential funding to address safety or accessibility concerns on existing active travel routes;
- 4. Early development of future active travel schemes (including to support the development of housing), creating a pipeline of schemes to be funded by future government spending rounds or other local funding;
- 5. Development and delivery of high-quality capability building and behaviour change activities, enabling authorities to plan for and activate existing infrastructure and new capital schemes.

Having briefed the portfolio holder on the options for this funding CPOG have agreed the mandate to apportion the funding as follows:

£373,447 for the construction of Brian Vincent Way, a path from Willow Close to Pike Road. The development funding for this project has been mandated through CPOG. This funding will facilitate construction of an improved path which is a key link between Efford and Marsh Mills.

£150,000 for the construction of a new crossing of Budshead Road for people to use when crossing to Whitleigh Green shops. By providing a controlled crossing to the local shops residents will find it easier and be encouraged to walk to their local shops.

£48,000 for the implementation (construction) of physical measures to support our safer school streets programme. Works will include the tightening of the bell mouth of the junction which will act to reduce vehicle speeds and improve the crossing facilities for residents and school children.

£20,447 for essential enhancements and the early development of Dawes Lane, a key link between Brixton and Plymouth which condition has deteriorated.

£35,000 for the implementation (construction) of traffic signals at the Mutley Plain / Greenbank Road junction. This will enable the provision of a signal crossing at an existing

signal junction.

£70,000 for the implementation (construction) of traffic signals at the Ham Drive / Honicknowle Lane junction. Again, this will provide pedestrians crossing facilities at an existing signalised junction.

£50,000 for essential enhancements to replace the fence between Lucas Terrace and Seagull Bridge. This will address safety concerns due to the deteriorating condition of an existing fence which acts as a barrier to a steep slope.

Why is this your preferred option: (Provide a brief explanation why this option is preferred) and (Explain why this is a good capital investment and how this would be an advantage for the Council) and (explain how the preferred option is the right balance between the risks and benefits identified below).

The proposals provide changes required to enhance road safety and enable more people to walk and cycle so improving health and equality of access to opportunities. Whilst each of the elements are different, all are responding to a clear need.

The scheme aligns with Policy SPT9 – Strategic principles for transport planning and strategy: seeking to reduce the impact of severance caused by [a lack of quality] transport networks, enabling more journeys by walking, cycling and providing genuinely alternative ways to travel. At its core the policy places the adopted hierarchy of transport modes and routes based upon different modes, with walking and cycling at the top of the pyramid and first modes to be considered/improved.

The schemes also align with several Corporate Plan priorities to make Plymouth a fairer, greener city, where everyone does their bit.

- The projects will help ensure there are fewer potholes, with cleaner, greener streets and transport;
- The projects will help keep children, adults and communities safe; By doing this we will:
- Provide quality public services;
- Focus on prevention and early intervention;
- Spend money wisely.

**Option Analysis:** Provide an analysis of **'other'** options which were considered and discounted, the options considered must be a 'do Nothing' and 'do minimum' and 'viable alternative' options. A SWOT – Strength, Benefit, Opportunity, Threat analysis could be attached as an appendix).

| <b>Do Nothing Option</b>         | All of the funding is external and would therefore need to be returned  |
|----------------------------------|---|
|                                  | to the Department for Transport   |
| List Benefits:                   | No benefits to the people of Plymouth or Plymouth City Council  |
| List Risk / Issues:              | Local residents would be likely to question why Plymouth City Council has not accepted the funding. Similarly, the Department for Transport and Active Travel England would question this and it would undoubtedly impact upon the council's capability rating which would impact upon future funding allocations |
| Cost:                            | £0  |
| Why did you discount this option | This option was discounted on the basis that the changes are required to enhance road safety and help enable people to use more sustainable travel choices  |
|                                  |   |
| Do Minimum<br>Option             | Again, all of the funding is external, and so if only part of the funding were accepted, the rest would need to be returned to the Department for Transport   |

| No benefits to the people of Plymouth or Plymouth City Council   |
|--|
| As per the "do nothing option"   |
| £0   |
| As per the "do nothing option"   |
|  |
|  |
| Allocate funding to other eligible alternatives  |
|  |
| There is no shortage of unfunded proposals which would improve facilities for pedestrians and cyclists and therefore alternative proposals could undoubtedly be suggested albeit in different locations and benefiting different users.  |
| Careful consideration of deliverability and affordability has been given to these mandated projects. The introduction of alternatives at this late stage would require such considerations and then approval would be required by Active Travel England – all of which provides considerable risk. |
| £746,894   |
| The preferred package of measures is affordable and deliverable within the required timescales and funding available and, in supporting an already approved scheme on the capital programme helps avoid the risk of requiring corporate borrowing.   |
|  |

| Strategic Case:                      |  |
|--------------------------------------|--|

# **Outcomes and Benefits**

List the outcomes and benefits expected from this project.

(An **outcome** is the result of the change derived from using the project's deliverables. This section should describe the anticipated outcome)

(A **benefit** is the measurable improvement resulting from an outcome that is perceived as an advantage. Benefits are the expected value to be delivered by the project, measurable whenever possible)

# Financial outcomes and benefits: External funding of £746,894 provides needed facilities and so reduces the potential ask on PCC budgets. If we do not add external funding to the capital programme Plymouth will need to fund the improvements required. Sustainable transport improvements will help reduce severance, encourage mobility through walking, cycling and scooting that will improve health and help improve the place element of Plymouth by providing the means to encourage and enable residents to walk and cycle in their local neighbourhoods.

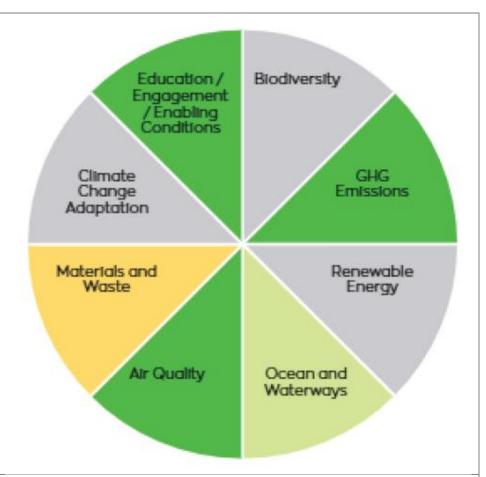

| SECTION 3: CONSULTATION                   |     |  |            |  |

# **Climate Impact Assessment**

Full completion of the CIA is required with the business case if the project is over £200k. (optional for under £200k).

Summary of the anticipated impact of the proposal on the climate (including any proposed mitigations and impacts beyond 2030) It is anticipated that the programme will have a positive climate impact.

The programme will deliver new routes, improved crossings and will encourage more residents to walk and cycle, providing the conditions to enable change. This is expected to have a long term or significant positive impact on Education / Engagement / Enabling Conditions; Greenhouse Gas Emissions and Air Quality. An upgrade to existing cycle paths and delivery of new crossings will require limited construction works which is expected to have a short term or limited negative impact. Nonetheless additional carbon intensive materials will be required to deliver the upgrades. The construction process will follow appropriate waste management processes and residual waste is expected to be minimal.

|--|-----|
| published.  Evidence is required that 'due regard' has been given to equalities in the decision making'. The EIA toolkit will provide you with all the necessary information to complete an EIA. It sets out   |     |

the reasons for completing an EIA including why and when to undertake an EIA. In this section the robustness of the proposals should be set out in financial terms.

# **SECTION 4: FINANCIAL ASSESSMENT**

**FINANCIAL ASSESSMENT:** The Project Manager will need to work closely with the capital and revenue finance teams to ensure that these sections demonstrate the affordability of the proposals to the Council as a whole. Exact amounts only throughout the paper - not to be rounded.

It is important to identify any revenue implications arising from this capital project, consider responsibilities for asset operation after project completion. Record that project with any implications has been discussed with revenue accountant (add name). If service borrowing and  $\leq £200$ k incl cost centre borrowing charges made to, estimate asset life, annual borrowing charge confirmed by capital accountants.

|--|--|
| Tax and VAT implications   | The project will not directly generate any VAT-exempt income for the Council. Transport and highways infrastructure works are a non-business activity and so any VAT incurred by the Council on costs relating to the highways scheme will be fully recoverable and there will be no adverse impact on the Council's partial exemption position. |
| Tax and VAT reviewed by  | Sarah Scott – Service Accountant   |
| Will this project deliver capital receipts? (If so please provide details) | No   |

| Has the revenue cost been budgeted<br>for or would this make a revenue<br>pressure | Once completed the schemes will need to be maintained via Highways Maintenance budget and it is considered that the impact will be low. The Head of Plymouth Highways has confirmed that the scheme will be incorporated into the Highways enhancement programme. There will be a maintenance liability for drainage clearance and vegetation cutback together with inspection regime to be introduced, this will be absorbed into existing Highways Budget. |            |            |            | ead of<br>neme will<br>ent<br>lity for<br>ether |                |  |

# **SECTION 5: RECOMMENDATION AND ENDORSEMENT**

# **Recommended Decision**

It is recommended that the Deputy Leader of the Council:

- Approves the Business Case;
- Allocates £746,894 capital funding for the project into the Capital Programme funded by Active Travel England (ATE) Consolidated Active Travel Fund (CATF);
- Authorises the procurement process;
- Delegates the award of contracts to the Service Director for Strategic Planning & Infrastructure where they do not already have authority to do so.

| Cllr John Stephens Strategic Planning | , Cabinet Member for and Transport | Service Director, Paul Barnard (Strategic Planning & Infrastructure |      |  |
