Devon & Cornwall Adult Data Summary Report August 2015

This is the data summary report for the 5 months to August 2015.

Analysis of data for all Wave 1 and Wave 2 services is included for comparison purposes (shown as 'National').

The intention of including data from all other sites is to highlight areas for further discussion and investigation. It should be recognised that, due to the diverse operating environments and populations served, there may well be legitimate underlying reasons for any differences other than good or poor performance.

We would encourage you to carry out further analysis of your local data to improve understanding of any differences arising.

Please note:

The first part of this report 'Cases identified – Engaging with L&D Services' analyses all the cases identified but subsequent analysis throughout the report is only for where the individual has engaged with the L&D service.

On the next page of this report is a summary of outcomes. It is imperative that the number of attended appointments and criminal justice system outcomes are recorded as accurately as possible; to evidence that service users are accessing the services they require on a timely basis.

A further breakdown of Outcomes and Interventions can be found towards the end of this report.

Cases identified - Engaging with L&D Services
